## Benefit payments are different

Workflow, data privacy and compliance demand a different approach than traditional AP invoices. Audit trails and payment confirmation play an important factor in processing. Make Benefit AP automation a snap with Tabulera.

## Remittance advice formats

Carriers and vendors often require specific remittance advice formats along with an electronic payment. Tabulera maintains a library of remittance advices allowing you to focus on the workflow, not the technical details.

## Pay commissions more effectively

Let Tabulera's Commission Module calculate and pay insurance commissions. Eliminate manual calculations and tedious spreadsheets and even provide online remittance advices to producers and brokers.
