- ✓ EDI connectivity

Employer-facing automation across product lines and subsidiaries

You've assembled a team of insurance experts in compliance, risk, underwriting, claims, and provider management. Now you need the tools to scale and be efficient.

Creating and maintaining employer facing administration systems, however, can be difficult, tedious, and time-consuming.

With Tabulera insurance administrative solutions, create an employer-friendly eco-system allowing you to streamline your employer facing insurance operations. Allow employers to on-board more quickly, and efficiently while maintaining the connectivity to other internal systems. Make on-going billing and reconciliation problems, that can create write-offs and customer ill will, a thing of the past.

Tabulera's technology-agnostic insurance carrier software simplifies health benefits plan insurance-related employer administration so you can continue to focus on strategic areas of your business. Modernize your accounts receivable processes and eliminate spreadsheet reconciliations with employers.

Lack visibility and clarity in your distribution channels?

✗ Never enough time for administration?

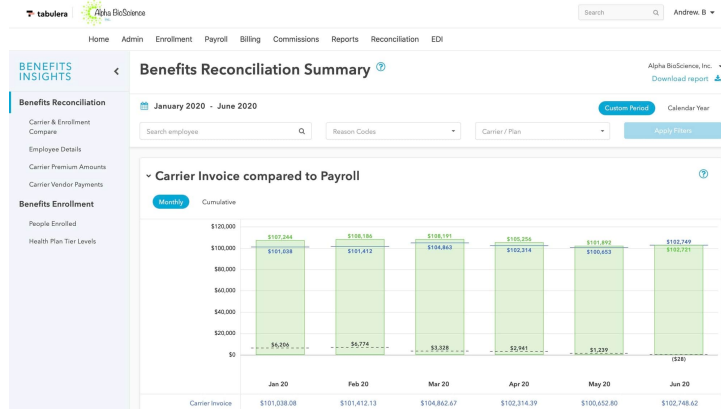

Working with clients on enrollment file validations, self-bill administration, delinquent payments and accounting issues that drain valuable resources.

✗ Employers changing system vendors, plans and carriers faster than they can keep up with self-bill formats?

It's not uncommon for employers to be making significant plan changes now each year due to rising costs. At the same time, you spend months onboarding new clients and starting down the path of administering plans only to find out that clients change again, trapping you and your clients in a cycle of manual administration.

✗ Commission reporting requiring significant time?

Overrides, splits and retroactivity. Reporting, calculating and paying commissions is both time consuming and cumbersome.

Streamline manual processes with Tabulera's insurance carrier software

Platform agnostic

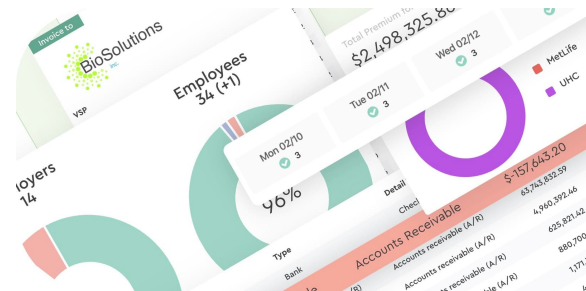

Enrollment engine agnostic platform creates consolidated feeds to billing platforms across multiple lines and subsidiaries

Prevent errors

Electronically bill clients and match with enrollment feeds and avoid costly reconciliation errors

Clear view

Provide brokers and producers with commission dashboards
