

Introducing Tabulera EDI Connectivity

Built right and shipped ahead of time

Create, generate and send carrier EDI enrollment feeds based upon carrier specifications and your plan setup

SCHEDULE DEMO

Create, generate and send carrier EDI enrollment Quick EDI connections to benefit carriers

EDI connectivity

Exchange a wide variety of data with your vendor and carrier partners, streamlining business processes for repetitive tasks such as enrollment, payroll deductions and employer contribution files.

[LEARN MORE](#)

401K contributions

Schedule, create and transmit 401k files to your plan administrator(s). Tabulera provides the perfect control environment so you retain a record of your transmissions and an audit trail of each transaction.

Stay ahead of your competition

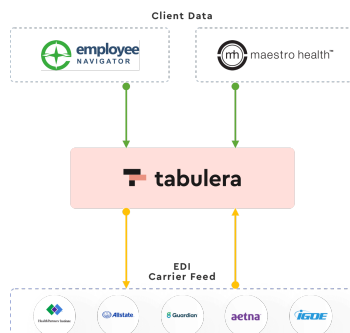

Accelerate your EDI creation process with Tabulera's technical team that does hundreds of files per year. Have files approved into production in days, not months.

EDI released in days

Regardless of your enrollment platform

Tabulera can translate data from any platform and transmit a variety of EDI formats to carriers or vendors. If you have the need to combine files from multiple data sources - rely on Tabulera.

401k EDI extension

Publishing 401k payroll contribution files is error prone, repetitive and a time-consuming manual process. Now accurately automate tasks that can be scheduled to free up valuable time reducing costs. Tabulera allows users to schedule, create and transmit 401k files automatically to plan administrators.

Create

Create a variety of 401k EDI formats to integrate with plan administration platforms.

Schedule

Schedule repetitive transmission of 401k files to plan administrators to avoid missing contribution deadlines.

Transmit

Keep accurate records of which 401k files have been generated, transmitted and received by your plan administrator.

Integrate with any carrier

Tabulera's extensive library of carrier connections and experience in supporting EDI functionality allows customers the ability to trade data bi-directionally with carrier partners.

Having trouble reading EDI files?

Many non-technical groups need quick answers to routine questions about the contents of their EDI employee benefit enrollment files.

FAQ

✓ What is an EDI 834 file?

The **ANSI 834** EDI Enrollment Implementation Format is a standard file format in the United States for electronically exchanging health plan enrollment data between employers and health insurance carriers

✓ How long does it take to build an EDI carrier connection?

Once an insurance carrier provides Tabulera with the specifications, Tabulera usually takes 2 weeks to develop an EDI file connection. Carriers then go through a testing process that may take extra time for final approval.

✓ How often do you send EDI files to carriers?

Tabulera can send files as frequently as daily, but most carriers schedule delivery of files once a week.

✓ What are the benefits of using Tabulera's EDI connectivity

The EDI connectivity module eliminates manual interactions of highly-sensitive data and consistently monitors all connections to ensure reliable data delivery. Tabulera also runs a number of pre-EDI edits on the data you send allowing detection of invalid or missing data.
